

NCE N-Channel Enhancement Mode Power MOSFET

Description

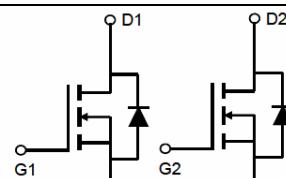

The NCE40ND0812S uses advanced trench technology and design to provide excellent $R_{DS(ON)}$ with low gate charge. It can be used in a wide variety of applications.

General Features

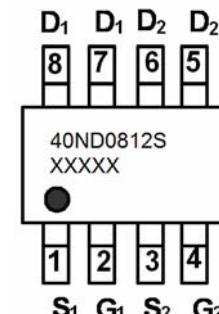

- $V_{DS} = 40V, I_D = 8A$ $V_{DS} = 40V, I_D = 12A$
- $R_{DS(ON)} < 18m\Omega @ V_{GS}=10V$ $R_{DS(ON)} < 14m\Omega @ V_{GS}=10V$
- $R_{DS(ON)} < 28m\Omega @ V_{GS}=4.5V$ $R_{DS(ON)} < 20m\Omega @ V_{GS}=4.5V$
- High density cell design for ultra low Rdson
- Fully characterized avalanche voltage and current

Application

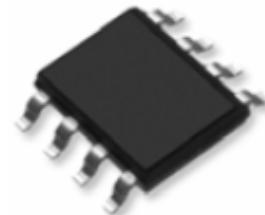

- Power switching application
- Hard switched and high frequency circuits
- Uninterruptible power supply

Notes:

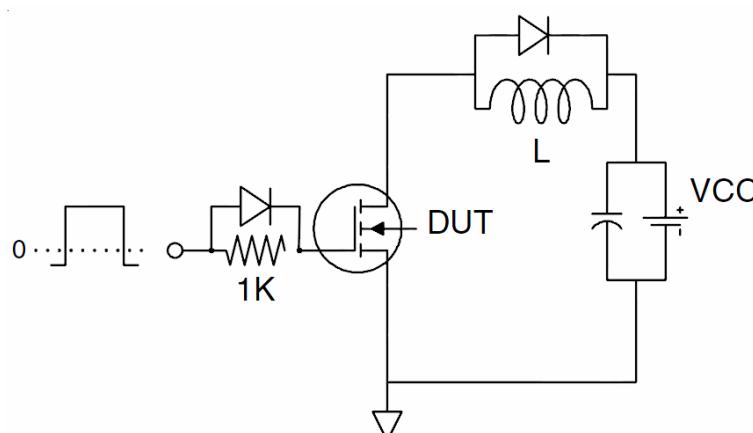

1. Repetitive Rating: Pulse width limited by maximum junction temperature.
2. The value of R_{GJA} is measured with the device mounted on 1in² FR-4 board with 2oz. Copper, in a still air environment with $T_A=25^\circ\text{C}$. The value in any given application depends on the user's specific board design. Surface Mounted on FR4 Board, $t \leq 10$ sec. The current rating is based on the $t \leq 10\text{s}$ thermal resistance rating.
3. Pulse Test: Pulse Width $\leq 300\mu\text{s}$, Duty Cycle $\leq 2\%$.
4. Guaranteed by design, not subject to production.

- Any and all NCE power products described or contained herein do not have specifications that can handle applications that require extremely high levels of reliability, such as life-support systems, aircraft's control systems, or other applications whose failure can be reasonably expected to result in serious physical and/or material damage. Consult with your NCE power representative nearest you before using any NCE power products described or contained herein in such applications.
- NCE power assumes no responsibility for equipment failures that result from using products at values that exceed, even momentarily, rated values (such as maximum ratings, operating condition ranges, or other parameters) listed in products specifications of any and all NCE power products described or contained herein.
- Specifications of any and all NCE power products described or contained herein stipulate the performance, characteristics, and functions of the described products in the independent state, and are not guarantees of the performance, characteristics, and functions of the described products as mounted in the customer's products or equipment. To verify symptoms and states that cannot be evaluated in an independent device, the customer should always evaluate and test devices mounted in the customer's products or equipment.
- NCE power CO.,LTD. strives to supply high-quality high-reliability products. However, any and all semiconductor products fail with some probability. It is possible that these probabilistic failures could give rise to accidents or events that could endanger human lives, that could give rise to smoke or fire, or that could cause damage to other property. When designing equipment, adopt safety measures so that these kinds of accidents or events cannot occur. Such measures include but are not limited to protective circuits and error prevention circuits for safe design, redundant design, and structural design.
